Architecture Services and Education

Fatima Khan

Email Id: serviceheb@gmail.com

ABSTRACT:

Architecture is a technology-intensive discipline. It uses technology, both in the process of design and also in production. It is believed that digital computer technology has a strong impact on architectural design, architectural teaching as well as in practice. Image architecture, digital simulation and virtual scene among other applications have gradually become progressive architectural design phrases. There exists a necessity that architectural teaching should adapt to such transformations. Depending on the level of service requested of an architect number of services offered by either the architect or their consultants. The motive of this paper is to focus on architecture services as well as education.
